

Kostas Kaplanis et al.  
Docket 1051ACON  
Appl. No. 10/760,124

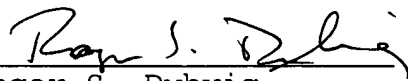

Remarks

The specification is amended to correct the cross-reference to related applications and to correct a minor typographical error.

Claim 1 is amended to overcome informalities noted in the parent application regarding the use of the terms "opening" and "window" and to avoid the two periods at the end of the claim. Claim 1 is also amended to specify that the light source is separate from the heating element, and is believed to be free from the rejection thereof under Section 103 in the parent application.

Claim 2 is amended to independent form, including the correction of the opening/window informality. In addition, claim 2 is amended to avoid any possible confusion between the recitation of "at least one radiant heating element" and "the heating elements."

Respectfully submitted,

  
Roger S. Dybvig
